Hi Michael-

On Tuesday you uploaded a package for the Texas hornshell 6 month extension into DTS. It has been routed to PPM after the RD's surname, and now we're running into problems. They won't surname it because it is not the version they edited, which is now in HQ and nearing time for publication.

As I see it, we have two options to resolve this. Let me know if either one works for you.

1- Remove PPM from the routing list for that package. This is how we normally treat listing packages- the RD surnames, and all of the documents come back to the listing biologist for moving to HQ.

2- Upload the latest version of the document to DTS and let them go ahead and surname. I've attached it here.

What do you think?

Thanks-

Susan
